Allowable Subject Matter

Claims 1-4 are allowed.

The following is an examiner's statement of reasons for allowance: applicant's arguments are deemed persuasive and furthermore, the prior art taken alone or in combination fails to anticipate or fairly suggest the limitations of the claims, in such a manner that a rejection under 35 USC 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claim 1.

Specifically regarding claim 1, Lee et al. (6857127) teaches the state of the art of an objective lens driving apparatus.

But, Lee et al. fails to explicitly teach a combination of all the claimed features including a center of said magnet in a height direction is located nearer said optical disc than a center of driving of said lens holder when said lens holder is in a neutral position in which all of said coils are supplied with no electric current, as claimed.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
